

PREMANT®

Plastic-clad pipe

I **Wide Range of Services for**

From advice

Brugg Pipe Systems provides complete solutions, from thermal decoupling to the end consumer. Our full product range contains rigid plastic-jacketed pipes, flexible pipe systems and accessories for any application.

Together with our service package - from engineering to production and delivery to installation - we are a competent system supplier of local and long-distance energy networks.

Successful pipeline projects

Our many years of project and product expertise have an extremely beneficial effect on the timing, quality and cost of your project.

We can look after your static calculations, provide system solutions and deliver our products to site within an extremely short time.

Advice and Planning

PREMANT® Local and Remote E

to installation

PREMANT®- cutting edge technology for efficient production

Our pipes are available in sizes ranging from DN 20 to DN 1000.

The choice of foam insulation, medium pipes and monitoring lead system is yours.

Our modern production system allows us to react quickly to your requirements.

Standard parts

Thanks to our modern infrastructure we can deliver bars and standard parts from stock.

Short delivery times

Need a customer-specific moulded part? We will deliver special parts in record time.

Installation

We have well-coordinated installation partners with qualified welding specialists who will carry out pipe laying work of any kind, including drilling, repairs and reconstruction.

Energy Lines

EWELCON® Electric welding sleeves - innovative technology

Pipe connections are the weakest points in a long-distance heating system.

This is because normal sleeve connections are often technically inadequate, incorrectly installed and therefore leak. Consequence: the resulting heat loss reduces the performance of the network considerably. The damage is also expensive to put right once it has been found.

Our patented electric welding sleeves set new standards in sleeve technology. Due to homogeneous welding with the jacket tube they provide non-positive, waterproof and sealed insulation.

Pipe insulation

EWELCON-S® Welding Sleeves

For new projects or insulating pipes with jacket dimensions of up to 450 mm.

EWELCON® Welding Sheet

For repairs and reconstruction up to jacket dimensions of 1200 mm.

EWELCON® electronically controlled welding process

The 100% heat-seal for your pipe system

Pipe system for the future

District heating – Industry – Petrol stations – System packages

Your partner for pipe systems

We are the people you should talk to when you need to find efficient solutions for transporting liquid materials. With our project engineers, development department, in-house production unit and our professional team of fitters, we have the know-how and the resources to look after your projects competently and reliably. For all types of heating systems, petrol station construction, industrial plant construction and system packages.

Customer-specific solutions

Brugg is the full service provider in the field of single-wall, double-wall and insulated pipe systems. This know-how allows us to manufacture project-specific customised items.

Give us a call!

Our engineers would be pleased to advise you and find a made-to-measure solution.

International network

Our global partnership network can be reached on site at any time. More than 34 partners in 20 different countries will look after you wherever you are.
